

Amendments To The Specification
(In The Revised Format)

Please insert the following paragraph at the end of the first full paragraph on page 12 of the Specification between the lines 9 and 10.

It is generally well known in the art of liquid display device that a liquid display device is comprised of a plurality of unit pixels, and the device depicted in FIG. 3A of the present application, for example, may represent generally the structure of each unit pixel. For an illustration, FIG. 6 (not drawn to scale) shows an example of two unit pixels (among a plurality of unit pixels in a liquid display device) arranged side-by-side. A plurality of these unit pixels shown as an illustration in FIG. 6 may be connected to each other in a two-dimensional array of unit pixels in the liquid crystal display.
